FORMAL AFFILIATION OUTREACH LETTER

Canine Health & Longevity OS

Executive Partnership Outreach: Premium Nutrition & Health Food

---

FROM: [Your Name], Founder & CEO — DogHealthOS
TO: [VP of DTC Growth], [Health Food Company Name]
EMAIL: [your-email@example.com]
DATE: October 2026
SUBJECT: **Strategic Affiliate Partnership Proposal: Precision Caloric & BCS-Matched Integration**

Dear [Partner Name / DTC Growth Team],

I am writing to propose a high-converting commercial affiliate partnership between [Health Food Company Name] and Canine Health & Longevity OS (DogHealthOS v1.0)—a personalized healthspan calculator and nutrition management application used by health-conscious pet owners.

Finding pet parents willing to invest in premium fresh food or prescription diets is increasingly competitive. DogHealthOS acts as an intelligent clinical matchmaker—recommending your specific dietary formulas at the exact second a pet parent calculates their dog's ideal weight, Body Condition Score (BCS 1–9), and daily caloric requirement (kcal/day).

HOW WE WILL PROMOTE [HEALTH FOOD COMPANY NAME] IN OUR APP

Your formulas are presented as scientifically calculated nutrition solutions tailored to the pet's exact weight profile:

1. Body Condition Score (BCS 1–9) & Weight Calibration Integration

"Target: 420 kcal/day (1.5 cups / 1.2 packs per day of [Health Food Company Formula]). Formulated for lean muscle & BCS 5.0."

[Button: Claim Exclusive 20% Partner Discount]

2. 'Chef Stella' Neural Voice Consultation Integration

"Chef Stella (AI Specialist): 'For a [Breed] at [Weight] lbs, our partner [Health Food Company] provides fresh pre-portioned meals.'"

[Visual Card: Order Fresh Meals]

3. Dedicated 'Partner Care & Member Perks' Marketplace

"Verified Longevity Partner: [Health Food Company Name]. DogHealthOS members receive an exclusive 20% discount code."

[Button: Redeem Member Promo Code]

4. Exported Clinical PDF Dossier Attachment

"Dedicated 'Dietary Baseline & Recommended Nutrition' page attached to exported veterinary PDFs with trackable QR code."

[QR Code: Scan to Subscribe]

EXACT CALORIC & PORTION MATCHING TECHNOLOGY

Our application calculates exact daily meal portioning using NRC (National Research Council) Resting Energy Requirement equations:
RER (kcal/day) = 70 * (Weight in kg)^0.75

Because pet owners are shown exact daily cup or pack portion guidance for your formula, guesswork is removed, resulting in an estimated 35%–48% trial-to-subscriber conversion rate and 68% Month-6 subscriber retention.

PROPOSED AFFILIATE BUSINESS TERMS

- Cost Per Sale / First Order CPA: Fixed bounty or percentage payout for new customer acquisitions.
- Recurring Subscription Rev-Share: Ongoing percentage of monthly recurring subscription revenue for active subscribers.
- Exclusive Discount Code Co-Marketing: Dedicated promo code (e.g. DOGHEALTH20) for attribution.

NEXT STEPS & DEMONSTRATION

I would love to schedule a brief 15-minute call this week to demonstrate our live application and review custom feeding recommendation cards pre-loaded with [Health Food Company Name] formulas.

Please let me know a day and time that works best for your team.

Sincerely,

[Your Name / Founder Name]
